

Attorney Docket No. 10559-382001
Application No. 09/734,330
Amendment dated June 1, 2004
Reply to Office Action dated February 23, 2004

ABSTRACT

Simple network management protocol or SNMP is encapsulated into HTTP traffic. The HTTP traffic is in a form that allows it to pass through a firewall. At one end, the SNMP request is encapsulated and sent to a remote computer. The remote computer de-encapsulates the request and responds to the SNMP request. The SNMP response is encapsulated as an HTTP response, and sent to the management station which interprets the results.
